intAct Race-Power

Starter batteries | filled and charged

Completely maintenance free | calcium/calcium technology

No compromise for the new intAct Race-Power series either in terms of durability or in terms of the price-performance ratio.

intAct Race-Power batteries are completely maintenance-free, high-performance accumulators manufactured on the basis of the new calcium/calcium grid expanded metal technology. The

use of eight different case sizes allows the replacement of up to 90% of all common batteries. This has been made possible by constructing a battery with an improved performance of up to 30% above the EN standard. These batteries are used for all common starter applications.

Product line: intAct Race-Power, 12 V starter batteries
Model: Calcium/calcium expanded metal technology, completely sealed and maintenance free, double cover
Status: GUG = filled and charged
Quality: OEM quality
Storage life: Storage life up to nine months
Charging voltage: Approved for charging voltage of up to 14.8 V

Magic eye: Charging status control
Cold start capacity: Higher cold start capacity in amps
Accessories: Incl. cover strip adapter
Properties: Eight battery types cover 90% of all passenger car batteries
Use: Passenger cars – trucks – agricultural machinery – tractors – buses – construction equipment
